Invitation to Attend the Rededication Ceremony for the On-Site Wastewater Treatment Training Center

When: Tuesday September 22\textsuperscript{nd} 2015  
10:00AM to 2:00 PM

Where: Texas A&M Riverside Campus  
Avenue D, Building #7900  
Bryan, Texas

We are pleased to announce that after going off-line for the past several years, the On-Site Wastewater Treatment Training Center is back on-line and ready for use once again. The Center was originally dedicated in September 1995 and served as a valuable facility for training and demonstration of On-Site Wastewater Treatment Systems (aka Septic Systems and OSSFs) until about 2008. The Center was out of order until early part of this year.

With the help from Texas A&M University, the Texas On-Site Wastewater Association, and other partners we are pleased to bring the Center back on-line. We invite you to join us for the rededication ceremony of the Center during this year’s SepticSmart Week. Work on upgrading the technologies at the Center will continue during this year and the early part of the next year, however, the Center is available now for training and demonstration purposes. Please join us in acknowledging the support and interest in our Center from public and private institutions and to celebrate the rebirth of the Center on its 20\textsuperscript{th} anniversary.

Contact Ryan Gerlich (ragerlich@ag.tamu.edu) or Randy Chelette (randy@txowa.org) if you have any questions about this event.

For Direction: Google “Texas A&M University Riverside Campus” and follow the attached map to building #7900.
