TEXAS A&M  
**AGRI LIFE**  
EXTENSION

**Course Description:**

This 3 hour course is presented by Texas A&M AgriLife and provides a basic understanding of the operational and maintenance activities of conventional and aerobic septic systems, and explains how activities within the home impact septic systems. Presentations will cover the treatment processes, health and safety considerations, and an overview of how to inspect and maintain the system. This course also provides answers to the most frequently asked septic and aerobic system questions, including when to pump out a tank and what can or cannot go down the drain.

*Funding for this event is made possible through a Clean Water Act Section 319(h) grant from the Texas State Soil and Water Conservation Board*
